Solusi

Batasan

- Keterampilan analitis
- ~~• Keterampilan kreatif~~ Bukan fokus pertama!

Halpern Critical Thinking Assessment (HCTA)

- **Lebih relevan dengan dunia kerja**
- **Lebih lengkap dalam pengukuran**

Alternatif HCTA

- ***Watson-Glaser Critical Thinking Appraisal (WGCTA)***
- ***KCritical Reasoning Test (KCRT)***

Unique Value Proposition

- **Variasi soal bisa tidak terbatas**
 - Hasil memberdayakan agen AI (ChatGPT, Gemini, dll)
- **Dapat menyajikan simulasi keputusan**
 - Sistem memberikan situasi berantai dan pertanyaan lanjutan ketika peserta ujian salah membuat keputusan

Unique Value Proposition

- **Soal bisa lebih relevan dan praktis**
 - Sesuai jabatan atau industri tiap peserta ujian
- **Dapat menghadirkan informan virtual**
 - Sistem mensimulasikan dunia kerja nyata di mana peserta bisa berkonsultasi dengan rekan kerja

A customer calls to complain about their internet connection speed, which they claim has been slow for the past three days. However, our system shows that the average download speed in their area is 40 Mbps, which meets the advertised minimum speed of 35 Mbps. The customer's router is also updated with the latest firmware, and there are no reported outages or maintenance activities in their area during the time period they experienced slow speeds.

However, upon further investigation, you discover that the customer has a device (a streaming media player) connected to their network, which uses about 10 Mbps of bandwidth. Moreover, this device is set to automatically update its software and content at peak hours, which could potentially cause congestion on the customer's internet connection.

Which one of the following explanations best addresses the customer's complaint?

- A) The customer's internet speed meets the advertised minimum speed, so there's no issue.
- B) The streaming media player is causing congestion on the customer's internet connection.
- C) The customer should consider upgrading to a faster internet plan to accommodate their heavy usage.
- D) We need to investigate further and check the physical connectivity between the router and modem.

****Analysis:****

This question requires analytical thinking as it involves:

1. Identifying relevant information (customer's complaint, system data, device usage)
2. Analyzing relationships between factors (device usage causing congestion)
3. Evaluating evidence and arguments (is the customer's internet speed really an issue?)
4. Making a decision or recommendation based on the analysis

This type of question assesses the candidate's ability to break down complex situations into manageable components, identify key information, and make informed decisions based on that analysis.

>>> what's the best answer for the question above?

****Best Answer:****

- B) The streaming media player is causing congestion on the customer's internet connection.

Tantangan

- Jawaban, penjelasan, dan pendekatan tidak konsisten antar agen AI
 - Rawan mengandung bias dan halusinasi yang dihasilkan oleh agen AI
- Kecurangan penggunaan AI oleh peserta

Tantangan

- **Terbatasnya akses terhadap studi kasus di dunia nyata**
- **Penggunaan AI yang kurang bijak dapat membuat pengeluaran membengkak**

A telecommunications company recently launched a new data plan called 'Infinity Unlimited', designed to attract high-data users who frequently stream videos, play online games, or conduct video conferences. This launch coincided with an upgrade of their network infrastructure aiming to improve connectivity speeds and reduce latency in urban areas during peak hours. However, after the first month, customer service representatives have noticed a pattern: while overall satisfaction scores remain high, there is a slight uptick in complaints regarding inconsistent data speeds experienced by users in suburban regions, not covered by the upgrade. Management wants to address this issue without undermining the positive reception of 'Infinity Unlimited'. The customer service team has been tasked with devising a strategy that balances addressing these concerns while reinforcing the value proposition of their new plan.
